

PRE-LAUNCH ROADMAP

How to get involved and where we're going.

STEP 1. RECRUIT

The most important thing we can do is expand our community of builders and attract users for the data marketplace - starting with native and indigenous groups.

STEP 2. FUND

We've obtained and are applying for additional grant funding to support essential operations. Surplus provides future token value prior to launch.

STEP 3. COORDINATE

Participate in projects, polls and discussions to help us build a community owned open-source data marketplace, open-access publication server and decentralized seed bank.

STEP 4. DELIVER

Deploy the marketplace and reward DAO contributors using \$CSAT tokens. Seed liquidity and conduct token sales to bootstrap marketplace activity.
